ANDY'S PORTFOLIO

On the recommendation of his financial adviser, Andy leaves a portfolio worth £50,000 at the start of the year untouched during the Q2 market turbulence...

Andy's portfolio is split 50% equities (MSCI World) and 50% fixed interest (IA Sterling Corporate Bond). No rebalancing take place. Source: FE data as at 1/10/2020.

Past performance is not necessarily a guide to future performance and the value of investments (and any income from them) can go down, so an investor may get back less than the amount invested.
